(57) **ABSTRACT**

A playing card wagering game method which involves players placing a three part wager and utilizing the standard counting technique of cribbage. Cards are dealt four down to all players that ante and the dealer. Players inspect their cards and are given the choice of folding (withdrawing from the game) or placing a second wager. A common fifth card is revealed and upon inspection players are again given the choice of folding or placing a third wager. After each player decides on whether to fold or stay, the dealer then reveals dealer's cards. Dealer maintains a point requirement to open. All remaining players which did not fold are then resolved where the highest hand (initial four dealt cards including common card) wins and tying hands push. Player's winning hands are paid in accordance with paytables.
